

ROADWORKS AT WALL ISLAND & MUCKLEY CORNER

Highways England response to the issues surround Wall Island and Muckley Corner:

The scheme is to include the reallocation of road markings and directional markers with the replacement of road studs. The scheme has been designed so that road users are able to navigate the island whilst having clear and visible road markings. We're pleased to confirm that work is due to begin on 13 May 2019.

Highways England are also due to start work on the A5, Muckley Corner on 13 May 2019. The scheme has been designed for the reallocation of road markings and replacement of reflective studs. The Wall Island and Muckley Corner schemes have both been designed to be combined together which we aim to cause minimal disruption to users as possible
